-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budininkas et al. (US Pat. 4,656,831) in view of Miramontes (US Pat. 3,808,805).

Budininkas et al. discloses engine exhaust gas, which passes through a catalytic reactor and then through a precooler and condenser in order to extract water. The catalytic converter completely oxidizes the hydrocarbons present in the exhaust. Treated exhaust gas is cooled to 120-150 F and then further air conditioned to 65-75 F whereupon condensation occurs, that is the dew point is reached. (abstract, col. 2, lines 5-31, col. 3, lines 15-44) Budininkas et al. discloses diversion of the exhaust gas stream, but not the use of the gas.

Miramontes discloses the conversion of exhaust gases into harmless products. The exhaust gases are directed through a refrigerating system to cool the gases to below 100 C and then through a compressor in order to condense the water. The condensed water is removed and the waste gases (processed exhaust gas) are recycled to the engine's cylinders. (abstract, col. 2, lines 5-15)

It would have been obvious to one of ordinary skill in the art at the time of the invention to recycle the processed exhaust gas because of the enhanced efficiency.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See US PTO-892.
